Route: iplm/ipnode/I

URL: https://admin.myslbb.com/#/iplm/ipnode/I

Overview

This page is a draft SOP reference for the above screen in **i2i Core OSS/BSS**. It is auto-generated from UI exports and should be reviewed for operational correctness before customer release.

When to Use

- Use this screen for the workflow represented by this route.
- Do not make billing/AAA/provisioning-impacting changes without required authorization.

Typical Workflow

1. Verify you are working on the correct entity (Customer/Account/Service).
2. Review the current lifecycle state before making changes.
3. Apply changes and validate system response.
4. Confirm downstream impact (AAA/Provisioning/Billing) where applicable.

Field & Action Hints (Auto-detected)

- **Actions detected:** Auto, Close, Mediation, IP Node, New Server, SmartLink Mediation Node, 49.143.255.165

Validation & Safety Checks

- Confirm identifiers before saving.
- Confirm lifecycle state allows the change.
- Confirm rollback/support path exists for production actions.

Escalation Guidance

- **L1:** Verify input, permissions, and entity state.
- **L2:** Validate dependencies and downstream state.
- **L3/Admin:** Policy/config changes or suspected defect.

The screenshot displays the SmartLink Admin interface. At the top, there is a navigation bar with the SmartLink logo, user information (Priyesh Chauhan), and a search bar. Below the navigation bar is a menu with various categories like Customer, Partner, Product, Network, Billing, Inventory, Ticket, WiFi, Reports, AAA, Mediation, and System. The main content area shows the 'IP Nodes' section, which includes a 'New Server' button and a search bar for IP addresses. A table lists the IP nodes, with one entry visible: 'SmartLink Mediation Node' with IP address '49.143.255.165', management IP '49.143.255.165', last updated '14-Aug-2025 5 months ago', and updated by 'D: Priyesh Chauhan'.

#	Node Name	IP Address	Management IP	Last updated	Updated By
1	SmartLink Mediation Node	49.143.255.165	49.143.255.165	14-Aug-2025 5 months ago	D: Priyesh Chauhan

Route: iplm/ipreqflw

URL: <https://admin.myslbb.com/#/iplm/ipreqflw>

Overview

This page is a draft SOP reference for the above screen in **i2i Core OSS/BSS**. It is auto-generated from UI exports and should be reviewed for operational correctness before customer release.

When to Use

- Use this screen for the workflow represented by this route.
- Do not make billing/AAA/provisioning-impacting changes without required authorization.

Typical Workflow

1. Verify you are working on the correct entity (Customer/Account/Service).
2. Review the current lifecycle state before making changes.
3. Apply changes and validate system response.
4. Confirm downstream impact (AAA/Provisioning/Billing) where applicable.

Field & Action Hints (Auto-detected)

- **Actions detected:** Auto, Close, Mediation, IP Request Flows

Validation & Safety Checks

- Confirm identifiers before saving.

- Confirm lifecycle state allows the change.
- Confirm rollback/support path exists for production actions.

Escalation Guidance

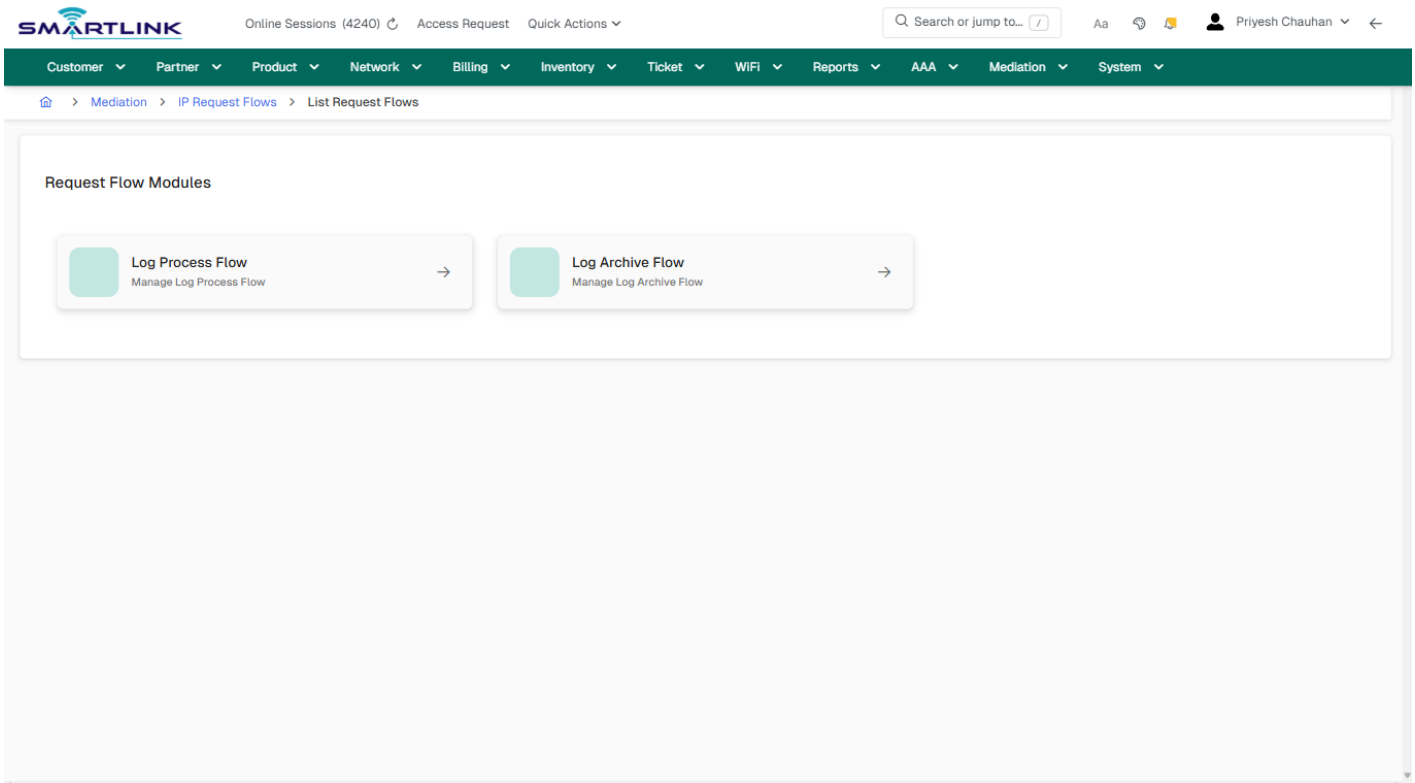

- **L1:** Verify input, permissions, and entity state.
- **L2:** Validate dependencies and downstream state.
- **L3/Admin:** Policy/config changes or suspected defect.
