

dev > settings > firm > all

dev > settings > firm > all

Route: dev/settings/firm/all

URL: https://admin.myslbb.com/#/dev/settings/firm/all

Overview

This page is a draft SOP reference for the above screen in **i2i Core OSS/BSS**. It is auto-generated from UI exports and should be reviewed for operational correctness before customer release.

When to Use

- Use this screen for the workflow represented by this route.
- Do not make billing/AAA/provisioning-impacting changes without required authorization.

Typical Workflow

1. Verify you are working on the correct entity (Customer/Account/Service).
2. Review the current lifecycle state before making changes.
3. Apply changes and validate system response.
4. Confirm downstream impact (AAA/Provisioning/Billing) where applicable.

Field & Action Hints (Auto-detected)

- **Actions detected:** Auto, Close, Network, Settings, Device Firmware, Add Firmware

Validation & Safety Checks

- Confirm identifiers before saving.
- Confirm lifecycle state allows the change.
- Confirm rollback/support path exists for production actions.

Escalation Guidance

- **L1:** Verify input, permissions, and entity state.
- **L2:** Validate dependencies and downstream state.
- **L3/Admin:** Policy/config changes or suspected defect.

The screenshot displays the SMARTLINK admin dashboard. At the top, there's a navigation bar with the SMARTLINK logo, user information (Priyesh Chauhan), and a search bar. Below this is a dark green menu bar with various system categories like Customer, Partner, Product, Network, Billing, Inventory, Ticket, WiFi, Reports, AAA, Mediation, and System. The main content area shows the 'Device Firmware' section, which includes a search bar, a table with columns for Version, Firmware Type, Model Name, URL Mode, Release Date, Created On, and Action, and a button to 'Add Firmware'. The table currently shows 'No Firmwares found'.
