Route: pro/iqos/addiqos

URL: https://admin.myslbb.com/#/pro/iqos/addiqos

Overview

This page is a draft SOP reference for the above screen in **i2i Core OSS/BSS**. It is auto-generated from UI exports and should be reviewed for operational correctness before customer release.

When to Use

- Use this screen for the workflow represented by this route.
- Do not make billing/AAA/provisioning-impacting changes without required authorization.

Typical Workflow

1. Verify you are working on the correct entity (Customer/Account/Service).
2. Review the current lifecycle state before making changes.
3. Apply changes and validate system response.
4. Confirm downstream impact (AAA/Provisioning/Billing) where applicable.

Field & Action Hints (Auto-detected)

- **Fields detected:** QoS Policy Name, Download Speed, Upload Speed, AAA Policies, Tx Burst Rate, Tx Burst Threshold, Tx Burst Time, Rx Burst Rate, Rx Burst Threshold, Rx Burst Time
- **Actions detected:** Auto, Close, Product, Internet QoS Policy, Add, Save, Cancel

Validation & Safety Checks

- Confirm identifiers before saving.
- Confirm lifecycle state allows the change.
- Confirm rollback/support path exists for production actions.

Escalation Guidance

- **L1:** Verify input, permissions, and entity state.
- **L2:** Validate dependencies and downstream state.
- **L3/Admin:** Policy/config changes or suspected defect.

The screenshot shows the 'Internet QoS Policy' creation page in the SmartLink admin system. The page has a dark green header with navigation menus and a search bar. The main content area is titled 'Internet QoS Policy' and includes a sub-section for 'Basic Details' with various input fields for policy parameters. Below this is an 'Additional Parameters' section with a table that is currently empty, showing 'No Data found'. The page concludes with 'Save' and 'Cancel' buttons.

Internet QoS Policy
