

pro > voucher > batch > add

pro > voucher > batch > add

Route: pro/voucher/batch/add

URL: https://admin.myslbb.com/#/pro/voucher/batch/add

Overview

This page is a draft SOP reference for the above screen in **i2i Core OSS/BSS**. It is auto-generated from UI exports and should be reviewed for operational correctness before customer release.

When to Use

- Use this screen for the workflow represented by this route.
- Do not make billing/AAA/provisioning-impacting changes without required authorization.

Typical Workflow

1. Verify you are working on the correct entity (Customer/Account/Service).
2. Review the current lifecycle state before making changes.
3. Apply changes and validate system response.
4. Confirm downstream impact (AAA/Provisioning/Billing) where applicable.

Field & Action Hints (Auto-detected)

- **Fields detected:** Batch Name, Voucher Type, Description, Voucher Template, No of Items, Lock Status, Pin Generation Method, Batch Prefix, Pin Prefix, Pin Type, Pin Length, Serial Prefix, Serial Type, Serial Length
- **Actions detected:** Auto, Close, Product, Vouchers, Batch, Cancel, Generate

Validation & Safety Checks

- Confirm identifiers before saving.
- Confirm lifecycle state allows the change.
- Confirm rollback/support path exists for production actions.

Escalation Guidance

- **L1:** Verify input, permissions, and entity state.
- **L2:** Validate dependencies and downstream state.
- **L3/Admin:** Policy/config changes or suspected defect.

The screenshot shows the 'New Voucher Batch' form in the SMARTLINK system. The form is divided into three main sections: Basic Information, Batch Configuration, and Serial & Pin Configuration. The 'Basic Information' section includes fields for 'Batch Name', 'Voucher Type' (set to 'External'), 'Description', 'Voucher Template' (set to 'Fiber Voucher'), and 'No of Items'. The 'Batch Configuration' section includes 'Lock Status' (set to 'Unlocked'), 'Pin Generation Method' (set to 'Random'), and 'Batch Prefix' (set to 'BAT'). The 'Serial & Pin Configuration' section includes 'Pin Prefix', 'Pin Type' (set to 'Numeric'), 'Pin Length' (set to '6'), 'Serial Prefix' (set to 'AD'), 'Serial Type' (set to 'Numeric'), and 'Serial Length' (set to '15'). The form is part of a navigation menu with options like Customer, Partner, Product, Network, Billing, Inventory, Ticket, WiFi, Reports, AAA, Mediation, and System. The user is logged in as Priyesh Chauhan.

New Voucher Batch

Create new voucher batch
